

SCENARIA

Lowest Dose CT

Now at Cullman Regional Medical Center

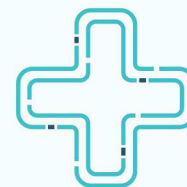

The new top-of-the-line Scenaria 128-slice CT from Hitachi, now at Cullman Regional Medical Center is the latest generation CT scanner that has been designed with integrated dose reduction technologies, including "iterative reconstruction" processing providing the lowest amount of radiation exposure possible and maintaining the highest image quality.

The 128-slice CT has the most advanced clinical capabilities and unique features to provide a notably more comfortable experience for all patients, from pediatric, to oncological, to elderly, and offers:

- Lowest radiation exposure possible
- Fastest scan times
- Cardiac imaging capability
- Large opening and wide
- Accommodating for patients to 500 lbs
- Powerful 3-D visualization tools
